PROFESSIONAL SUMMARY

Full-Stack Developer specializing in backend systems and scalable web applications using Next.js, Node.js, and PostgreSQL. Experienced in optimizing database performance and secure API design to significantly reduce latency while ensuring data integrity. Proven ability to build production-ready systems with a focus on clean architecture, seamless user experiences, and real-world performance constraints.

TECHNICAL SKILLS

Programming Languages : JavaScript, TypeScript, Java, C, SQL

Frontend : React.js (Vite), Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend : Node.js, Express.js, REST API Design, Redis, Mongoose, Prisma ORM

Databases : MongoDB, PostgreSQL, MySQL, Pinecone, Database Design, Query Optimization

DevOps & Cloud : Docker, CI/CD Pipelines (GitHub Actions)

GenAI : LangChain, Groq API, HuggingFace API, RAG Pipelines, Vector Search, Prompt Engineering

Tools : Git, GitHub, Postman, Razorpay, Clerk, JWT Authentication, VS Code

PROJECTS

TaskHub - Project Management & Team Collaboration | *Next.js, Node.js, Redis, PostgreSQL*

- Developed a scalable project management platform with **role-based access control** and secure **Razorpay subscription workflows**, ensuring **reliable database consistency** and secure payment processing.
- Optimized backend performance using **Redis caching and database indexing**, reducing API response times from **~300ms to <10ms (40x improvement)** and cutting database load by **~70%**.
- Implemented production-grade **CI/CD and Dockerized deployment** pipeline with multi-stage builds, reducing build time by **~60–70%** and enabling **zero-downtime releases**.
- **Live:** taskhub-v1.vercel.app

CodeAtlas - AI Codebase Intelligence | *TypeScript, Next.js, Pinecone, Groq, LangChain*

- Built an AI-powered codebase analysis platform that indexes GitHub repositories and ZIP archives, enabling developers to explore architecture, dependencies, and execution flows through natural language queries.
- Implemented **AST-based code parsing using ts-morph** to extract functions, classes, React components, and dependency metadata, improving code understanding beyond traditional text-based retrieval approaches.
- Developed a retrieval and visualization engine using **Groq LLMs, LangChain, Mermaid.js, and React Flow** to generate architecture diagrams, execution traces, and repository-level insights from indexed codebases.
- **GitHub:** github.com/shivamdarekar/CodeAtlas-AI

TrendsWave - Full-Stack E-Commerce Platform | *React, Node.js, MongoDB, Tailwind CSS, Razorpay*

- Built a full-stack e-commerce platform with **optimistic UI updates** and automatic guest-cart merging on login, improving perceived responsiveness by **~80%** and enabling seamless user experience across sessions.
- Implemented secure order processing using **MongoDB transactions** and atomic stock updates, preventing overselling and ensuring reliable order consistency during concurrent checkouts.
- Integrated an **AI-powered chatbot assistant** for product search and recommendations, while optimizing backend queries with field projection and indexing to reduce API payload size by **~40–50%**.
- **Live:** trendswave.vercel.app

EDUCATION

Parul Institute of Technology, Parul University

BTech – Computer Science and Engineering | **CGPA: 7.67/10**

Aug 2023 – May 2027

Vadodara, Gujarat

- * **Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

ACTIVITIES AND INVOLVEMENT

- **University Innovation Ambassador (PIERC):** Member of the organizing team for college **hackathons and startup-related events**, mentored **50+ students** on technical roadmaps and acted as a student-faculty liaison to drive campus innovation initiatives.
- **Management Team Member (Metaverse Club):** Collaborated with cross-functional teams to plan and execute high-impact events, managed end-to-end **logistics and real-time problem-solving** to ensure smooth execution under strict deadlines.
- **Hackathon Competitor:** Actively participate in college-level hackathons, collaborating in agile team environments to solve real-world problems through **rapid software development** and prototyping.
