PROFESSIONAL SUMMARY

Full-stack developer specializing in backend systems and scalable web applications using Next.js, Node.js, and PostgreSQL. Experienced in optimizing database performance and secure API design to significantly reduce latency while ensuring data integrity. Proven ability to build production-ready systems and lead cross-functional team initiatives in fast-paced environments.

EDUCATION

Parul Institute of Technology, Parul University

Aug 2023 – May 2027

BTech – Computer Science and Engineering | CGPA: 7.57/10

Vadodara, Gujarat

- **Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

TECHNICAL SKILLS

Programming Languages : JavaScript, TypeScript, Java, C, SQL

Frontend : React.js (Vite), Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend : Node.js, Express.js, REST API Design, Redis, Mongoose, Prisma

Databases : MongoDB, PostgreSQL, MySQL, Database Design, Query Optimization

DevOps & Cloud : Docker, CI/CD Pipelines (GitHub Actions)

Tools : Git, GitHub, Postman, Razorpay, Clerk, JWT Authentication, VS Code

CS Fundamentals : Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, System Design

PROJECTS

TaskHub - Project Management & Team Collaboration | Next.js, Node.js, Redis, PostgreSQL

- Developed a scalable project management platform with **role-based access control** and secure **Razorpay subscription workflows**, ensuring **reliable database consistency** and secure payment processing.
- Optimized backend performance using **Redis caching and database indexing**, reducing API response times from **~300ms to <10ms (40x improvement)** and cutting database load by **~70%**.
- Implemented production-grade **CI/CD and Dockerized deployment** pipeline with multi-stage builds, reducing build time by **~60–70%** and enabling **zero-downtime releases**.
- **Live:** taskhub-v1.vercel.app

CiviSense - Civic Issue Monitoring System | Next.js, Redux, PostgreSQL, PostGIS, Docker

- Built a **civic issue monitoring platform** during a hackathon, enabling field workers to report issues with automatic GPS capture and location-based routing, which eliminated manual assignment errors and improved routing accuracy by **~90%**.
- Implemented **offline data persistence with automatic synchronization** upon network reconnection, ensuring reliable reporting in low-connectivity areas and reducing delays by **~60–70%**.
- Designed a **role-based workflow system** with status tracking and image validation, improving accountability and enabling **end-to-end traceability of the issue lifecycle**.
- **Live:** civic-issue-green.vercel.app

ImageCraft Pro - AI-Powered Image Processing SaaS | Next.js, TypeScript, Cloudinary AI, Redis

- Developed an **AI-powered image processing SaaS**, supporting compression, background removal, and format conversion with **real-time optimization and multi-format delivery (WebP, AVIF, etc.)**.
- Built a robust system with automated file lifecycle management, enabling **fast processing with minimal backend complexity** and reduced storage overhead.
- Secured APIs with Redis rate limiting and Clerk authentication, handling **high-frequency requests** while ensuring **data validation and standard security compliance**.
- **Live:** imagecraft-pro.vercel.app

ACTIVITIES AND INVOLVEMENT

- **University Innovation Ambassador (PIERC):** Member of the organizing team for college **hackathons and startup-related events**, mentored **50+ students** on technical roadmaps and acted as a student-faculty liaison to drive campus innovation initiatives.
- **Management Team Member (Metaverse Club):** Collaborated with cross-functional teams to plan and execute high-impact events, managed end-to-end **logistics and real-time problem-solving** to ensure smooth execution under strict deadlines.
- **Hackathon Competitor:** Actively participate in college-level hackathons, collaborating in agile team environments to solve real-world problems through **rapid software development** and prototyping.
